PROFILE

Software Engineer experienced in building and shipping production websites, mobile applications, authenticated backend workflows, and AI-assisted features with TypeScript, JavaScript, React Native, Node.js, PostgreSQL, and REST APIs. Built and published VitaStreak on Google Play and independently designed, built, deployed, and maintained two corporate websites.

PROFESSIONAL EXPERIENCE

Software Engineer & Web Lead | EUC Inovação Portugal | Remote | November 2025 - Present

- Independently designed, built, and launched two responsive corporate websites, owning information architecture, visual implementation, custom HTML/CSS/JavaScript components, SEO, deployment, and maintenance.
- Enhanced and maintained multiple multilingual production platforms, resolving responsive layouts, navigation, CSS conflicts, forms, canonical metadata, hreflang, caching, broken links, and cross-browser issues.
- Contributed to an existing React Native and TypeScript healthcare application by implementing Figma-based interfaces, resolving UI and interaction issues, and supporting selected backend and PostgreSQL tasks through a branch-based Git workflow.
- Managed production delivery across domains and subdomains, including DNS, cPanel, HTTPS/SSL, Apache configuration, cache/CDN purging, release validation, and technical troubleshooting.

PROJECTS

VitaStreak | React Native, Expo, TypeScript, Supabase, PostgreSQL, Gemini API | [Available on Google Play](#)

- Designed, built, and published an Android product with authentication, Row Level Security, flexible schedules, local notifications, bilingual localization, adherence tracking, and a home-screen widget.
- Created authenticated Supabase Edge Functions for Gemini-powered label extraction, validating structured outputs and letting users review data before persistence; reduced manual entry work by over 75% in development and testing with 10+ users.

MindGuess | React Native, Expo, TypeScript, Node.js, Zod, npm Workspaces

- Built a local probabilistic inference engine using weighted probability updates, entropy, and expected information gain, achieving 100% identification across the current 10-person evaluation dataset.
- Structured the codebase as an npm workspace and implemented seeded simulations plus 75 automated tests covering validation, edge cases, inference behavior, and dataset consistency.

My Inventory - Final-Year Project | React Native, Expo, TypeScript, Firebase, Gemini API

- Built a mobile inventory application with Firebase Authentication, Cloud Firestore, Cloud Functions, image-based AI extraction, QR codes, statistics, and PDF/Excel/JSON import-export workflows; presented in July 2025.

Developer Portfolio | HTML5, CSS3, JavaScript, Bootstrap, SEO | [Live site](#)

- Designed, developed, and deployed a responsive multipage portfolio with light/dark themes, accessible navigation, project filtering, Formspre validation, canonical URLs, Open Graph metadata, an XML sitemap, and GitHub Pages hosting.

TECHNICAL SKILLS

- **Frontend & Mobile:** React Native, Expo, React, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Responsive Design, Accessibility, Figma.
- **Backend & Data:** Node.js, REST APIs, Supabase Edge Functions, PostgreSQL, SQL, Firebase, Gemini API, Zod, Authentication, Row Level Security, Data Modelling.
- **Quality & Delivery:** Automated Testing, npm Workspaces, Git, GitHub, Docker, CI/CD Fundamentals, EAS, Google Play Console, SEO, DNS, HTTPS/SSL, Production Deployments.

EDUCATION

BSc in Computer and Telecommunications Engineering | Universidade Politécnica de Viseu | 2022 - 2025

LANGUAGES

Portuguese: Native | **English:** B2 (Upper-Intermediate) | **Spanish:** B2 (Upper-Intermediate)
