PROFILE

Software Engineer specializing in React Native and TypeScript, with experience across mobile products, production websites, and cloud-backed applications. Professional work includes web development, deployment infrastructure, UI implementation, and selected backend functionality. Built and published an Android app on Google Play, alongside AI-assisted software projects and a custom probabilistic inference engine.

PROFESSIONAL EXPERIENCE

Software Engineer | EUC Inovação Portugal - Porto, Portugal, Remote | November 2025 – Present

- Built two institutional websites from scratch for EUC Inovação Portugal and Euro Union Consult using HTML, CSS, JavaScript, and Bootstrap, delivering responsive, production-ready interfaces.
- Enhanced, deployed, and maintained four project websites: TwinRehab, Digital Twin Campus, PondiFarm, and MedEduSynth. Refined layouts, content structure, responsiveness, accessibility, and user experience before publication.
- Manage domains, DNS records, hosting, HTTPS, SSL certificates, SEO, production deployments, and ongoing maintenance across Wix and dominios.pt.
- Contributed to a React Native application by implementing UI adjustments from Figma designs and supporting selected backend functionality.

EDUCATION

BSc in Computer and Telecommunications Engineering | October 2022 – July 2025

Universidade Politécnica de Viseu - Escola Superior de Tecnologia e Gestão de Lamego (ESTGL)

CERTIFICATIONS

- EF SET English Certificate — B2 Upper-Intermediate | 2026
- Web Servers (IIS, Apache and Nginx) | 2025 - Recode & CDI Portugal
- Front-End Development With HTML, CSS, JavaScript and Bootstrap | 2025 - Recode & CDI Portugal
- Junior Cybersecurity Analyst Career Path | 2025 - Cisco Networking Academy
- Additional certifications and credentials available in **my portfolio**.

PROJECTS

VitaStreak | React Native, TypeScript, Supabase, Gemini API:

- Designed, developed, and published an Android supplement management app on Google Play, featuring AI-assisted label recognition, routine analysis, secure authentication, local notifications, bilingual support, an Android widget, and cloud-backed data management with Supabase. [Available on Google Play](#).
- Integrated the Gemini API to extract structured supplement data from product images, reducing manual data-entry time by more than 75% and achieving approximately 99% accuracy in selected tests.

MindGuess (Work in Progress) | React Native, TypeScript, Node.js, Zod, npm Workspaces:

- Architected a modular mobile guessing game powered by a local probabilistic inference engine, using entropy and expected information gain to select questions dynamically.
- Implemented reproducible question variation, strict Zod validation, automated dataset simulations, and 75 tests, achieving 100% identification across the evaluated dataset.

My Inventory (Final-Year Project) | React Native, TypeScript, Firebase, Gemini API:

- Built an inventory management application integrating the Gemini API for automatic product identification and structured data extraction from images.
- Achieved over 99% accuracy across the evaluated test set, demonstrating reliable extraction of structured product information.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript (ESNext), Python, SQL, HTML5, CSS3.
- **Mobile & Frontend:** React Native, Expo, React, Bootstrap.
- **Backend & Data:** Node.js, Supabase, PostgreSQL, Firebase, REST APIs, Zod, Data Modeling.
- **Testing, Tooling & Infrastructure:** Automated Testing, Figma, npm Workspaces, Git, GitHub, Docker, DNS, SSL/HTTPS, Production Deployments.
