PROFILE

Software Engineer specializing in React Native, React, TypeScript, and full-stack product development. I currently work as a Software Engineer and Web Lead, building production web platforms, managing deployment infrastructure, and contributing to mobile development and backend data modelling. I have published a mobile application on Google Play and developed AI-assisted mobile products, cloud-backed applications, and a probabilistic inference engine.

PROFESSIONAL EXPERIENCE

Software Engineer | EUC Inovação Portugal

Porto, Portugal, Remote | November 2025 – Present

- **Web Development & Quality Control:** Built the company's institutional web platforms from scratch and continue to maintain and evolve them using HTML, CSS, JavaScript, and Bootstrap, ensuring responsive behavior, consistent quality, and production stability.
- **Web Infrastructure & Operations:** Independently manage the end-to-end web infrastructure, including domain management (e.g., dominios.pt), DNS configurations, SSL/HTTPS certificates, and production deployments.
- **Mobile & Database Collaboration:** Contribute to mobile application interfaces in React Native and support backend data modeling with SQL and PostgreSQL.

EDUCATION

BSc in Computer and Telecommunications Engineering | October 2022 – July 2025

Instituto Politécnico de Viseu - Escola Superior de Tecnologia e Gestão de Lamego (ESTGL)

CERTIFICATIONS

- EF SET English Certificate — B2 Upper-Intermediate | 2026
- 5G and Wireless Technologies | 2026 - NAU Platform
- Web Servers (IIS, Apache and Nginx) | 2025 - Recode & CDI Portugal
- Front-End Development With HTML, CSS, JavaScript and Bootstrap | 2025 - Recode & CDI Portugal
- Junior Cybersecurity Analyst Career Path | 2025 - Cisco Networking Academy
- Network Technician Career Path | 2025 - Cisco Networking Academy
- Boost Your Productivity with Artificial Intelligence | 2025 - APDC & Google Portugal

PROJECTS

VitaStreak | React Native, TypeScript, Supabase, Gemini API

- Published a mobile application on Google Play for supplement routine management, featuring AI-assisted label recognition and routine review, secure authentication, local notifications, and end-to-end data management with Supabase. [Available on Google Play](#)

MindGuess (Work in Progress) | React Native, TypeScript, Node.js, Zod, npm Workspaces

- Architected a modular mobile guessing game powered by a local probabilistic inference engine, using entropy and information gain to select questions dynamically. Implemented reproducible question variation, strict Zod validation, dataset simulations, and 75 automated tests, achieving 100% identification across the current dataset.

AI-Powered Inventory Management App (Final-Year Project) | React Native, TypeScript, Firebase, Gemini API

- Built an inventory management application integrating the Gemini API for automatic product identification and structured data extraction from images, achieving over 99% accuracy in the evaluated test set.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript (ESNext), Python, SQL, HTML5, CSS3.
- **Mobile & Frontend:** React Native, Expo, React, Bootstrap.
- **Backend & Data:** Node.js, Supabase, PostgreSQL, Firebase, REST APIs, Zod.
- **Testing, Tooling & Infrastructure:** Automated Testing, npm Workspaces, Git, GitHub, Docker, DNS, SSL/HTTPS, Production Deployments.
